## WASHING/CARE INSTRUCTIONS

2013

Proper care will increase the life span of most any product you purchase, especially items such as our laundry bags and cart covers. Each fabric has it's own set of washing/care instructions, but here are a few basic rules to follow for the main fabric types:

**Synthetic Nylons & Synthetic Polyesters** – Spray and Wipe clean with mild detergent, or Cold Water Wash, Line Dry or Tumble Dry Low Heat. Excessive heat will cause melting. Over time, nylon colors can fade, especially if in the sun for long periods of time. The sun can also cause the fabric to dry rot if over exposed.

**Cotton & Poly/Cotton** – Cold Water Wash, Tumble Dry Low Heat. Excessive heat will cause shrinkage. Colors may bleed or fade slightly when washed. Should always wash cotton & poly/cotton colors one time before using.

**Spun Polyester** – Able to withstand normal wash and dry process. Colors may bleed or fade slightly when washed. Should always wash spun polyester colors one time before using. Slight shrinkage may occur when dried, but should be minimal.

**Polyester Mesh** – Able to withstand industrial wash and dry process. Colors are heat set to prevent bleeding and fading. Slight shrinkage may occur when dried, but should be minimal.

**Vinyl** – Spray and Wipe clean with mild detergent. Over time, vinyl colors can fade, especially if in the sun for long periods of time. The sun can also cause the fabric to dry rot if over exposed.

**Clear Vinyl** – Spray and Wipe clean with mild detergent. Marine Grade. Better suited for outdoor use. Able to withstand cracking and dry rotting better than standard vinyls.

*Excessive heat can cause most any fabric to shrink or melt.  
Call or email anytime for more detailed care/washing instructions.  
We are here to help answer any questions or concerns you may have!*
